Full-stack developer with 5+ years of experience building scalable web applications and internal tools using Ruby on Rails, React.js, Next.js, and Python. Proven track record in end-to-end system design, API integrations, automation scripting, and cross-functional collaboration. Experienced in leading frontend/backend development, mentoring junior engineers, and delivering robust solutions across domains like digital signage, hospitality, and network device management. Passionate about clean architecture, continuous improvement, and building high-quality, maintainable systems.

TECHNICAL SKILLS

Languages/Frameworks: React.js, Next.js, Node.js, Express, Ruby on Rails, Python, FastAPI, Flask, Cordova, React Native,Langchain

Databases: MySQL, PostgreSQL, MongoDB, IndexedDB

Testing & Tools: RSpec, Pytest, Vitest, React Testing Library, Selenium, ChromeDriver, Postman, Swagger

Other Tools: Azure DevOps, JIRA, ADB, Telnet, Git, Vite,RAG

WORK EXPERIENCE

Software Development Engineer , Jio Platforms Ltd Navi Mumbai	Sept 2020 – Present
JioSignage CMS	Jan 2022 – Present
Functional Role: Full Stack Engineer	
Key Responsibilities:	
- Developed the JioSignage CMS website using Ruby on Rails ,PostgreSQL & React, responsible for the entire development process from backend to frontend. - Collaborated with cross-functional teams to design and implement effective software solutions, enhancing the CMS's functionality and usability. - Integrated various widgets such as Facebook, Instagram, and Thomas Cook into the CMS to enrich content offerings.Developed a seamless video and image slideshow feature to enable smooth transitions between different media types, including video-to-video, image-to-video, and image-to-image. - Implemented and integrated a Queue Management System into the JioSignage CMS for specific clients such as HN Hospital, ensuring smooth operations for managing customer queues. - Implemented real-time features using Node.js and WebSockets for enhanced user interactivity in web applications. - Mentored junior developers, providing guidance on coding best practices, debugging, and development workflows to help them grow their skills and contribute effectively to the team. - Implemented GenAI use cases, including a chatbot using FastAPI, LangChain, and RAG, as well as image generation and inpainting using the GPT-IMAGE-1 model.	
Jio Spectra	Jan 2025 – Present
Functional Role: Full Stack Engineer	
Key Responsibilities:	
- Developed a customer support portal for monitoring gateway/extender health, connected device performance, and enabling actions such as reboot, factory reset, SSID configuration, log retrieval, 2.4GHz band steering, and device freezing. - Built core functionalities using Ruby on Rails, Inertia.js, React.js, and Vite, establishing a robust foundation for future enhancements.	

- Wrote automated tests using **RSpec** for backend APIs and **Vitest + React Testing Library** for frontend components, improving reliability and test coverage.
- Mentored junior developers in **React.js best practices**, conducting code reviews and guiding them in debugging and architectural decisions to enhance their productivity and contribution.

Jio Omni Portal

Jun 2024 – Jan 2025

Functional Role: Full Stack Engineer

Key Responsibilities:

- Led frontend development using Next.js with minimal backend dependencies, delivering high-performance UI.
- Integrated the portal with the Net Experience Cloud API to enable seamless connectivity and communication with partner systems.
- The portal is being developed to configure routers in a manner similar to Cisco, including designing a captive portal for enhanced user experience.
- Successfully implemented basic portal functionalities using Next.js, laying the groundwork for future development and enhancements.
- Mentoring junior developers, guiding them in frontend development using Next.js, providing support on best practices, and helping them improve their technical skills to contribute effectively to the project.

JioSignage Application

Jan 2022 – Jun 2024

Functional Role: Application Developer

Key Responsibilities:

- Developed the JioSignage Application for Samsung (SSSP) and LG Signage TVs and Mobile Apps platform using Cordova and JavaScript and React Native, enabling dynamic content display on commercial-grade screens. Integrated the solution with the JioSignage Content Management Portal (CMS) to allow remote management, scheduling, and deployment of signage content, providing an efficient and scalable solution for digital signage operations.
- Collaborated with the JioAds Team to implement a fallback feature that automatically displays JioAds for premium plan users when no content is scheduled from the JioSignage CMS. This ensures continuous content flow, optimizing ad revenue and engagement for seamless integration and functionality.
- Integrated JioSaavn Music Albums into the JioSignage solution, enabling customized playlists alongside signage content based on customer preferences. Worked with JioSaavn to tailor the music tracks to meet client specifications, creating a multimedia experience that complements the visual content.
- Collaborated with team members to ensure smooth workflow, resulting in timely project completions.

Jio Hospitality

Jan 2022 – Apr 2022

Functional Role: Frontend Developer

Key Responsibilities:

- Contributing to UI Development for Jio Hospitality, designing and implementing various pages such as the Welcome Letter, Content Management, About Page, Customer, and Billing pages using frontend libraries React and Vite for Deployment.
- Worked on the development of a product that enables seamless management of Set-Top Box (STB) content design for hotel rooms and the integration of OTT apps, driven by the JioHospitality CMS. The solution is widely deployed in luxury hotels like Oberoi, Trident, and others, enhancing the in-room guest experience.
- Enhanced user experience by implementing responsive web designs and optimizing application performance.
- Developed reusable components to facilitate faster development timelines and improve overall code quality.

STB & Home Gateway Automation

Sept 2020 – Jan 2022

Role: Automation Engineer

Key Responsibilities:

- Collaborated as a key member of the team that initiated and developed an automation project to streamline QA tasks, enhancing efficiency and accuracy in testing processes.

- Assumed full ownership of the STB & Home Gateway Automation project, encompassing requirement analysis, test case creation, test environment setup, and execution of test cases. Also Implemented a portal using the Mongodb, Express ,React & Node.js(MERN) stack to execute test cases and analyze reports, providing streamlined testing and reporting capabilities.
- Developed and maintained the automation framework utilizing Python scripting , significantly improving testing and ensuring robust test coverage and efficiency.
- Collaborated with cross-functional teams to identify and develop test cases for functional and performance testing, ensuring alignment with project objectives.
- Participated in root cause analysis efforts to resolve complex issues related to automated equipment performance.

ACHIEVEMENT

- Got Award in Jio for building crash ANR free customer
- Got R-Samman Award for my work appreciation
- Appreciated for mentoring junior developers and elevating code quality across teams.

EDUCATION

Bachelor Of Engineering (B.E.) , Computer Science Engineering

Thadomal Shahani Engineering College

University Of Mumbai

2016-2020
